Reflex 105-3 (three-sided fire) with EchoFlame Black Glass lining, with Left Open Corner Ventilation Bar

Granting 180° views, Reflex 105 Multi-Sided fires provide stunning visuals that can be experienced from any angle. Inside, dual independent burners allow you complete control over your fire, whether you want tall flowing flames, or a warming gentle glow. Beneath the logs, the ember bed is brought to life with Gazco's EmberLight LED up-lighting, offering year-round ambience that can be enjoyed with or without the flames and heat.

With an innovative optional kit, this designer fire can also be configured from a three-sided panorama to a corner installation if desired, with each format featuring non-reflective glass for uninterrupted atmosphere and complete visual clarity.

Exuding style and choice, the Reflex 105 Multi-Sided can be tailored to your specification with three lining options. Maximise the flame visuals with our depth-enhancing EchoFlame Black Glass lining, or choose Brick-effect or Ledge-stone-effect for a classic fireplace backdrop.

KEY DETAILS

HARMONY¹⁰ CONTROL SYSTEM

Each Reflex fire is complemented by our responsive Harmony¹⁰ Control System, which gives you complete control over your fire from ignition to extinguishing. Program your Reflex fire daily or weekly, or set the heat output thermostatically if desired.

For ultimate convenience as well as the ability to fine tune your Reflex fire's EcoFlex gas saving mode, optional Wi-Fi connectivity lets you control your fire via your Android or iOS mobile device.
